

## INFORMATION FOR PARENTS

You can help your son or daughter find books that best match his or her reading ability and interests. The following information explains how you can use Lexile® measures and “Find a Book, Georgia” to pick titles that best support your son’s or daughter’s reading over the summer and throughout the year.

### What is a Lexile measure?

A Lexile measure indicates the reading level of an individual or a book, and is represented as a number followed by an “L” (for example, 700L). By comparing your child’s Lexile measure with the Lexile measure of a book, you can decide whether its text demand will be too difficult, too easy or just right for your child’s reading ability. The best way to strengthen his or her reading skills is to have your child read books within his or her Lexile range.

### What is your child’s recommended Lexile range?

Your child’s Lexile range spans from 100L below to 50L above his or her Lexile measure. When your son or daughter reads within his or her Lexile range, he or she should be able to comprehend enough of the book to make sense of it, while still being sufficiently challenged to maintain interest and learning.

### How can I obtain a Lexile measure for my child?

There are three ways to determine an approximate Lexile measure for identifying books at a student’s appropriate reading level for summer reading.

1. Lexile measures are reported on the Individual Student Report for the Georgia Milestones English Language Arts Assessment.
2. Students can approximate their Lexile measures by looking at the Lexile measures associated with the last 4-5 books they read during the school year. Choose books around the Lexile measure of the book(s) they felt most comfortable reading.
3. Visit the “Find a Book, Georgia” site and enter the grade level of the student and check the statement that best describes the student’s comfort with reading and a Lexile range will be generated.

### How can you use Lexile measures to help a child find books?

With the free “Find a Book, Georgia” search tool, you can help your son or daughter select books that best match his or her reading ability (Lexile measure), interests and goals. It’s easy and fun to use!

1. **Go to [Lexile.com/fab/GA](http://Lexile.com/fab/GA)**
2. **Enter your child’s Lexile measure**
3. **Have your child select interest categories**
4. **View and refine the search results**

*As you browse books that your child finds interesting, click the “Find in a Library” button next to the book title to check its availability at your local public library.*

5. **Print your child’s custom reading list**

Visit “Find a Book” to submit your Summer Reading Pledge!

The Lexile Framework for Reading evaluates reading ability and text complexity on the same developmental scale.

Unlike other measurement systems, the Lexile Framework determines reading ability based on actual assessments, rather than generalized age or grade levels. Recognized as the standard for matching readers with texts, tens of millions of students worldwide receive a Lexile measure that helps them find targeted readings from the more than 100 million articles, books and websites that have been measured.

Lexile measures connect learners of all ages with resources at the right level of challenge and monitor their progress toward state and national proficiency standards.

## Should your child try to read books outside of his or her Lexile range?

Your child can read books that are above or below his or her Lexile range. However, books that are below your child's Lexile range may offer little challenge in terms of new vocabulary and complex grammatical structures. Similarly, books that are above his or her Lexile range may be too challenging and discourage the reader.

### *Higher Lexile measures allow an advanced and enthusiastic reader to:*

- be challenged with high-interest books above his or her Lexile level
- seek help with a hard but interesting book
- find other books on the same subject but at a higher Lexile level

### *Lower Lexile measures allow a struggling and reluctant reader to:*

- build skills with less challenging books on topics of choice
- select high-low books based on Lexile and developmental levels
- find other books on the same subject but at a lower Lexile level

## Does your child need a Lexile measure to use "Find a Book, Georgia?"

No. "Find a Book, Georgia" can estimate your child's starting Lexile range based on his or her grade and comfort with the reading materials at that grade level. Then, based on the book search results, your child can further refine his or her Lexile range to select books that best support successful reading.

## How is the Lexile measure of a book determined?

A book's Lexile measure is based on two characteristics: word frequency and sentence length. Once these factors are determined, MetaMetrics uses a proprietary scientific equation to assign a Lexile measure to the text, ranging from below 200L for early reader text to above 1600L for more advanced text. More than 150,000 books have Lexile measures, and this number continues to grow.

## Is a Lexile measure the only criteria to consider when picking a book?

A Lexile measure is a measure of text complexity only. It does not address the subject matter or text quality, age-appropriateness of the content or your child's interests. The Lexile measure is one piece of information that your son or daughter can use to select books.

Some books also have a Lexile code—a two-letter designation that appears before the Lexile measure (for example, AD580L)—to provide more information about the book's developmental appropriateness, reading difficulty, and common or intended usage. Visit [www.Lexile.com](http://www.Lexile.com) for more information on Lexile codes.

## Where can I find more information on Lexile measures?

For more information and to watch a six-minute video on Lexile measures, visit [www.Lexile.com](http://www.Lexile.com).

"Find a Book, Georgia" is offered in partnership with the Georgia Department of Education and Lexile-developer MetaMetrics®.
